

I am a truck driver that travels through a lot of cities. The only thing I can say is "Why Aren't there more cities on XM Traffic?" I enjoy the programming and I don't need a bunch of over paid politicians telling me what I need and not need. I work hard. The regular programming only works in my truck for a certain distance. With XM I can find out traffic info at the push of a button; even if I'm 100 miles away. I ask you why make a fuss over something that makes my job easier. Try dealing with real issues such as: WHY IS FUEL SO DAMN HIGH? I wish XM Radio came out 9 yrs ago.
